

Test Rubric — 25 Marks

Criterion	Marks	What to look for
1. Diagnosis and goals	5	Identifies the real restructuring issue, not just “cut costs.” Sets clear goals that balance cost reduction, operational performance, customer trust, accountability, and responsible AI adoption.
2. Proposed organisational restructure	5	Builds from the student’s own Phase 4 structure. Explains realistic changes to grouping, linking & alignment mechanisms and AI governance.
3. Responsible implementation plan	5	Explains how restructuring should take place responsibly, with safeguards against careless structural actions (e.g. layoffs).
4. Use of Strategic Design Lens and other relevant theory	5	Accurately applies relevant theory from prescribed readings. Theory should justify the proposal, not merely be named.
5. Risks, trade-offs, and professional clarity	5	Identifies at least two realistic risks or trade-offs and explains how to manage them. Answer is clear, structured, and written in a professional format.

Total: 25 marks

Mark bands for each 5-mark criterion

Marks	Standard
5	Excellent: clear, specific, realistic, well-justified, and directly applied to EcoTripp.
4	Good: mostly clear and relevant, with minor gaps or underdeveloped points.
3	Adequate: plausible but general, list-like, or unevenly explained.
2	Weak: superficial, unclear, or only partly relevant.
1	Very weak: minimal attempt, mostly unsupported or inaccurate.
0	Missing or not relevant.

What your final score indicates

Overall score	Band	Descriptor
22–25	Excellent	Strong coherent response. Clear diagnosis, realistic structure, responsible implementation, accurate theory use, and thoughtful risk management.
18–21	Good	Solid and mostly complete. Some areas may be less detailed, but the answer is sensible and grounded.
13–17	Adequate	Plausible but uneven. May list ideas without fully explaining fit, implementation, or theory.
8–12	Weak	Fragmented or shallow. Often focuses mainly on layoffs or AI adoption without coherent organisational design.
0–7	Poor	Incomplete, unrealistic, or weakly connected to EcoTripp, Phase 4, or the Strategic Design Lens.
